

Software Engineer

Ole Kristensen Full Stack | Frontend | UI/UX | Designsystems

SUMMARY

Enthusiastic about design and usability. Hands-on in the full stack for elegant, simple and responsive UI/UX, intuitive workflows simplifying complex tasks. Excels in team leadership, on-brand ui, design systems, data visualisation and motion graphics. Ardent about typography, kerning and margins as well as making people excel and innovate together.

Engaging team-player, enjoys working directly with stakeholders.
Framework agnostic. 20 years+ polyglot programming experience.

EXPERIENCE

Design Technologist 2017 -

DR, DANISH BROADCASTING CORPORATION

- Implemented iconic always-on full screen news display for Newsroom, solving concurrent video streaming, API caching, smooth transitions and rendering, off-line fallback and interactive state synchronisation.
- Lead small team maintaining full-stack Broadcast-critical browser-based motion branding solution for flow TV, bridging departments of Playout, IT Technology, Design, Marketing, Planning and Viewer Ratings/Insights.
- Supervised and architected in-flight replacement of aging monolithic backend completely with a performant Node.js based containerised microservice architecture.
- Established on-prem Docker Swarm GitLab CI/CD DevOps and migrated to common CDX enterprise GitHub actions and on-prem Kubernetes with full testability, telemetry and observability.
- Modernised in-house Node.js based After Effects render farm from Windows to MacOS, deployed using Ansible and achieving 99.9% uptime and 10x responsiveness for users.
- Advised design and technology departments on maintainability and complexity of parametric motion design assets, streamlining design assets and achieving house-wide branding consistency by establishing continuous deployment of ~1200 motion branding assets to hundreds of video editors.

Full stack developer 2022 - 2025

TV 2 DENMARK

- Architected and lead team engineering a SvelteKit based motion branding platform to fully replace end-of-life black-box proprietary system.
- Responsible for designing and implementing on-prem Kubernetes deployment using FluxCD with custom Helm Charts, CRD's, autoscaling backend, observability and minikube local development compatibility.
- Beautiful frontend component design, including full in-browser broadcast quality audio and video scopes written entirely in TypeScript using WebAudio, SVG and canvas, replacing expensive hardware scopes entirely.
- Factored out relevant services and components to OpenSource project.

Design Technologist 2018 -

DENFRIEVLJE.DK

- Advising Museum for the United Nations, designed and built bespoke interactive exhibition for Arup/DAC.

Software artist 2000 -

OLE.KRISTENSEN.NAME

- Bespoke expressive software for stage arts, lighting control, infrared tracking, projection mapping, remote timelapse photography and art installations.

EDUCATION

Master of Art & Technology 2003 - 2004

ONE YEAR STUDIES ABROAD, CHALMERS, IT UNIVERSITY, VALAND, GÖTEBORG

Bachelor of Interactive Media 1997 - 2000

PROJECTS

High-availability Newsroom
Display renderer in Svelte for DR
Nyheder

Full stack motion branding UX and
automation for TV 2 in SvelteKit

Technical design advisor for major
house rebranding of DR.

KEY ACHEIVEMENTS

Broadcast-critical node.js based
motion branding systems for the
two major Danish Broadcasters.

Full kubernetes stack for TV 2 with
small team in 3000 hours, major
consultancy estimate at ~ 10000h.

Streamlining, git versioning and
delivery of core motion branding
assets of DR house brands.

SKILLS

TypeScript, Node.js, Svelte(Kit),
Tailwind, React, WebSock, SSE,
MongoDB, Redis, Kubernetes,,
GitLab CI/CD, GitHub Actions,
FluxCD, ArgoCD, Ansible,
OpenTelemetry, Claude, Copilot,
CloudNativeFoundation.

C++, OpenCV, openFrameworks,
libCinder, OpenGL, ImGui, GigE
vision, Infrared tracking.

Arduino, ZigBee, ESP32.

Adobe After Effects automation.
